BRIDGSITE CORPORATE OVERVIEW

BRIDGSITE NIGERIA LIMITED (BNL) is a leading global provider of Engineering, Procurement, and Construction (EPC) services, dedicated to the Nigerian Oil and Gas industry and the broader sub-Saharan Africa region. Our extensive portfolio includes a diverse range of services, from turnaround maintenance to complex infrastructure projects.

As a dynamic EPC company, we operate through our specialized subsidiaries, Bridgsite Technologies and Afritech Assets Consults Limited. We excel in various sectors including oil and gas marginal field development, engineering design, procurement, and construction of oil and gas facilities, as well as public infrastructure, Specialist maintenance services for mechanical equipment, Technical consultancy and manpower, Onshore and Offshore Logistics support, Dredging, shore protection & Piling services, Land and marine logistics and training services.

At BRIDGSITE NIGERIA LIMITED, we are committed to delivering innovative, efficient and sustainable solutions that meet the highest standards of safety and quality. Our dedicated team of professionals leverages cutting-edge technology and industry best practices to ensure every project is executed flawlessly, on time, and within budget.

VISION, MISSION & CORE VALUES

OUR VISION

To be the leading indigenous oil and gas engineering services company in Africa, recognized for delivering innovative, safe, and sustainable solutions that drive economic growth, empower local talent, and create lasting value for our clients, stakeholders, and host communities.

OUR MISSION

To provide exceptional engineering and energy services through the deployment of highly skilled professionals, cutting-edge technology, and best-in-class project management practices — ensuring that every engagement delivers measurable value, on time, within budget, and to the highest standards of quality and safety.

Core Values

We conduct all our business dealings with transparency, honesty, and ethical rigor. Our clients trust us because we say what we mean and do what we say.

INTEGRITY

We integrate environmental responsibility and sustainable practices into our operations, recognizing our duty to preserve natural ecosystems for future generations. We entrust our teams to provide sustainable development for our company and for the communities where we are executing projects. Due to the nature and complexity of our business, we believe that only creating a strong and sustainable social and economic growth, we can build the foundation of our business.

SUSTAINABILITY

We embrace technology and creative thinking to solve complex energy challenges, continuously improving our processes, tools, and service offerings.

INNOVATION

We pursue the highest standards in every task we undertake — from talent recruitment to engineering design — consistently delivering quality that exceeds expectations.

EXCELLENCE

OUR COMPETITIVE ADVANTAGE

FORTUNE ENERGY & ENGINEERING COMPANY LIMITED differentiates itself from competitors through a unique combination of technical expertise, local content compliance, operational agility, and a client-first philosophy. Our advantages include:

Commercial & Strategic Strengths

Integrated service portfolio reducing need for multiple vendors.

Real-time project monitoring with advanced digital project management tools.

24/7 operational support across all active project sites

Strong financial backing with access to leading local and international credit facilities

Proprietary talent database of 2,000+ pre-qualified oil and gas professionals

Strategic alliances with international technology and engineering firms

Community development programs that build trust in host communities

Technical & Operational Strengths

Deep industry experience across upstream, midstream, and downstream sectors

Strong relationships with Nigerian regulators including DPR, NCDMB, and NAPIMS

Proven track record with IOCs, NOCs, and independent operators

NCDMB-certified indigenous company with robust local content programs

Robust HSEQ management system aligned to ISO 9001, ISO 14001 & ISO 45001

Comprehensive workforce that blends Nigerian expertise with international best practices

Flexible commercial models including lump-sum, reimbursable, and hybrid contracts

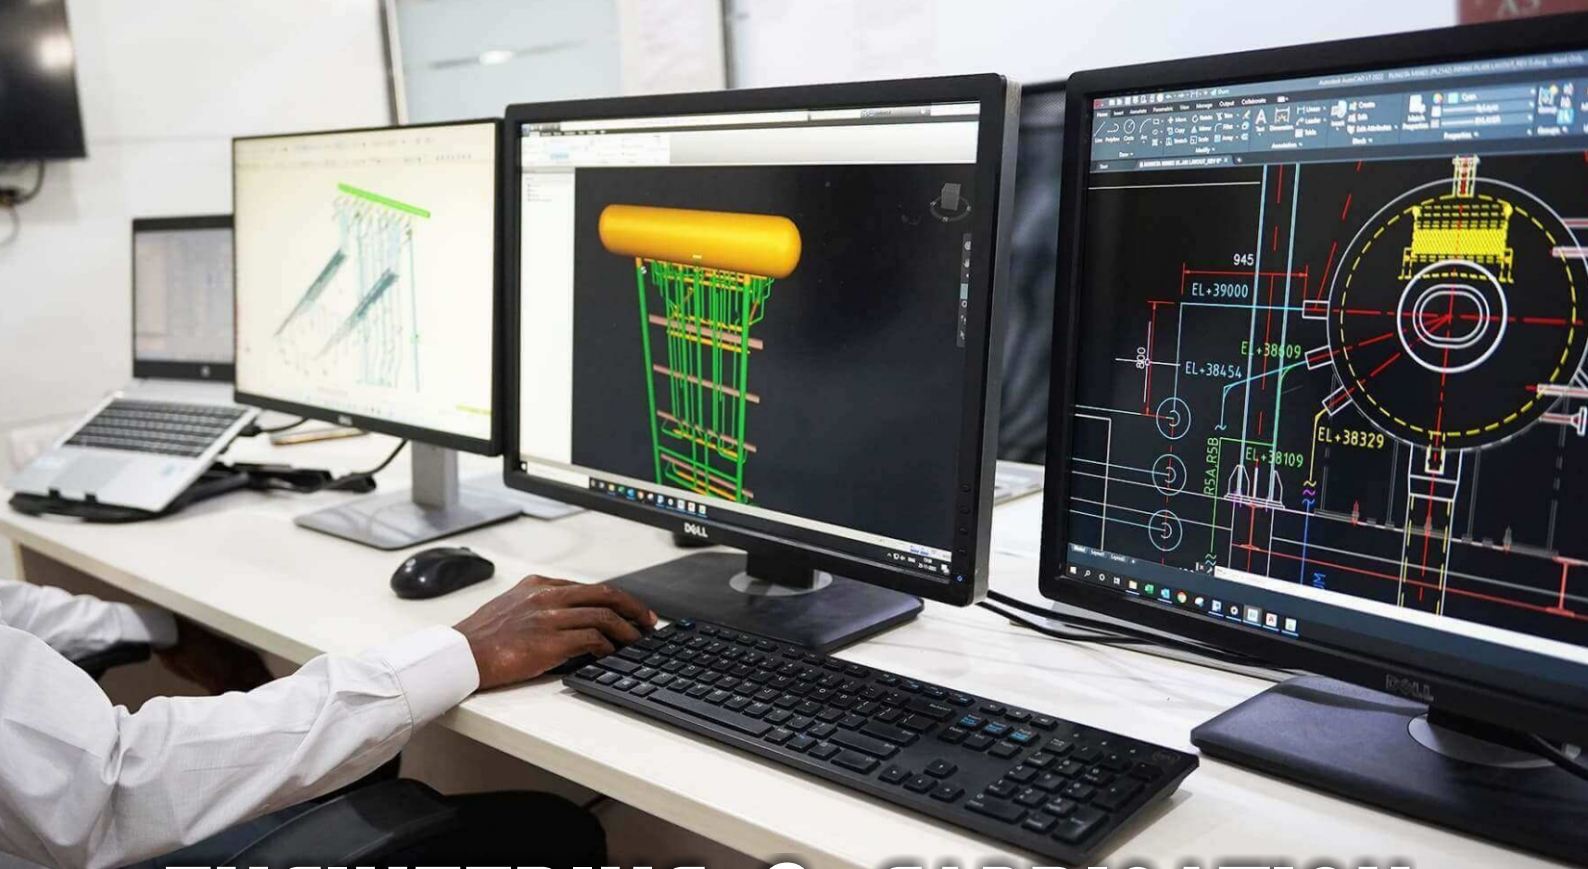

SERVICES PORTFOLIO

FORTUNE ENERGY & ENGINEERING COMPANY LIMITED provides five core service lines that collectively span the full lifecycle of oil and gas operations. Each service line is underpinned by deep technical expertise, a dedicated team, and robust management systems designed to deliver results safely and efficiently.

- **Engineering & Fabrication Services**
Structural Steel Detailing of Gantries, Warehouse, Steel Towers, Tanks, Equipment packages | Structural Steel Fabrication & Installation | Pipe spool Fabrication & Installation | Welding Services | Mechanical Construction Support | Equipment Installation | Project Management and Consultancy Services.
- **Procurement Support Services**
- **Assets Management (Operation and Maintenance Services)**
- **Technical Manpower Support Services**
- **Project Management and Consultancy services**

ENGINEERING & FABRICATION Services

Our Engineering Design Services division provides high-quality, technically rigorous design solutions across all phases of oil and gas facility development — from concept screening through to detailed engineering and design for construction. Our multidisciplinary engineering team employs industry-standard software tools and follows internationally recognized codes and standards to deliver engineering deliverables that are fit-for-purpose, safe, and cost-

Our Fabrication Services covers a wide spread of Structural Steel Detailing of Gantries, Warehouse, Steel Towers, Tanks, Equipment packages, Structural Steel Fabrication & Installation, Pipe spool Fabrication & Installation, Welding Services, Mechanical Construction Support and Equipment Installation

Fortune Energy's Procurement Services division delivers end-to-end supply chain management solutions, purpose-built for the complexity and criticality of oil and gas operations. We source, qualify, expedite, inspect, and deliver a comprehensive range of materials, equipment, chemicals, and consumables to client sites — on time, on specification, and within budget.

With established relationships with over 300 pre-qualified local and international vendors, and direct representation with major Original Equipment Manufacturers (OEMs), our procurement team eliminates the inefficiencies of fragmented supply chains. We operate a fully documented and auditable procurement management system compliant with client-specific and industry standards.

Procurement Scope & Categories

Equipment & Materials

Supplies & Logistics

Assets Management **OPERATION AND MAINTENANCE** Services

We operate under a rigorous Asset Integrity Management (AIM) framework that integrates reliability-centred maintenance (RCM) principles, risk-based inspection (RBI) methodologies, and computerized maintenance management systems (CMMS) to minimize unplanned downtime, extend asset life, and reduce total

Our Operations & Maintenance (O&M) Services division provides comprehensive, full-lifecycle operational support for oil and gas production facilities, gas processing plants, pipelines, and associated infrastructure. We deploy experienced operations teams that take complete ownership of day-to-day facility operations, performance optimization, and planned/unplanned maintenance activities — enabling clients to focus on their core business objectives.

TECHNICAL MANPOWER SUPPLY Services

Our Manpower Supply Services division is one of the most comprehensive and sophisticated technical staffing operations in the Nigerian oil and gas sector. We provide clients with access to pre-screened, competency-assessed, and fully mobilizable professionals across all disciplines and experience levels — from fresh graduates and technicians to senior engineers and executive consultants.

Service Description & Scope

We operate a dedicated Talent Management Centre (TMC) in Port Harcourt that maintains an active and continuously updated database of qualified professionals. Our recruitment, screening, and mobilization process follows a rigorous competency framework aligned to international standards including OPITO, BOSIET, HUET, COREN, ISO and IWCF.

PROJECT MANAGEMENT & CONSULTANCY Services

Fortune Energy's Project Management Services division provides clients with seasoned project professionals and structured management frameworks to ensure that projects are delivered on schedule, within approved budgets, and to the defined scope and quality standards.

We apply PMI's Project Management Body of Knowledge (PMBOK), integrated with oil and gas industry best practices from frameworks such as the Association for Project Management (APM) and the Project Production Institute (PPI).

Our project managers are PMP-certified professionals with hands-on experience managing projects ranging from small brownfield modifications to large-scale greenfield developments with capital values exceeding USD 100 million. We offer both fully embedded project management teams (integrated with client PMT) and standalone PMC (Project Management Consultant) services.

OUR

WORKSHOP AND FACILITIES

Fortune Energy & Bridgsite's capacity to deliver cost-effective solutions to its clients is

- 3500 square meters area of workshop space
- 20-Ton overhead gantry cranes
- 100-man capacity office workspace
- Design office equipped with state-of-the-art CAD software
- Workshop and office complex powered by 6 No. 250 kVA Generators
- Well-equipped painting, fireproofing and blast protection workshop section
- Automated control machining, welding and fabrication workshop section

CLIENT BASE

SECTOR COVERAGE

FORTUNE ENERGY & ENGINEERING COMPANY LIMITED has built a diverse and distinguished client base spanning the full spectrum of the Nigerian oil and gas industry. Our clients include International Oil Companies (IOCs), indigenous operators, Engineering, Procurement & Construction (EPC) contractors, and government agencies.

QUALITY ASSURANCE & COMPLIANCE

Quality is the foundation upon which FORTUNE ENERGY & ENGINEERING COMPANY LIMITED's reputation is built. Our Quality Management System (QMS) is designed to ensure that every deliverable — whether a staffed professional, a procured item, an engineering drawing, or an operational report — meets or exceeds the agreed specification and client expectation.

FORTUNE ENERGY is committed to the provision of excellent products and services to clients at optimal cost, through the application of quality management principles in its processes and activities from engineering, procurement, production, installation, commissioning and maintenance services. At FORTUNE ENERGY, a Quality Management system in accordance with the requirements of NIS ISO 9001:2009 is established, documented, implemented and maintained. Quality objectives covering all levels and functions of the company as established, are pursued vigorously and reviewed periodically, for effectiveness. Quality plans may be developed if specified by contract, to define how company quality meets contractual requirements.

HEALTH, SAFETY, ENVIRONMENT & QUALITY (HSE)

At FORTUNE ENERGY & ENGINEERING COMPANY LIMITED, Health, Safety and Environment(HSE) are not simply compliance obligations — they are core business imperatives embedded in our organizational culture and leadership philosophy. Our HSE Management System is built on a zero-harm principle and is aligned with internationally recognized standards and frameworks.

Fortune Energy is committed to the health and safety of all employees as well as the protection of the environment affected by our operations. For us, safety is a continuous process of training, re-training and monitoring. To this end, our policy aims to properly identify, assess and eliminate all forms of hazards in and around our work area.
